

Year 3 and 4 Quest Homework

Falcon, Goldfinch and Hawk - Autumn 1

Our topic this half term is all about our digestive system (including teeth) and our skeletal system (including muscles). We will also be learning about food chains and nutrition.

Throughout this topic, we would love to see some of the wonderful things that you can produce at home. Below is a list of activities to choose from to complete and bring into school or send to your class email. The deadline is the final Monday of the term (19.10.26), as this will give us time to look at everything that has been produced during the final week.

Enjoy, and we look forward to seeing what you produce.

Create your own model of the digestive or skeletal system. Be as creative as you can with the materials you use. See attached ideas for inspiration.

Create food chains for animals native to Zambia or another country of interest to you.

Show how humans, and some other animals, use skeletons and muscles for protection, support and movement. E.g. a model showing how muscles work.
